AT THE COUNTER

Made for the way you sell

Sell phones by model, storage and colour with the IMEI on every unit, upsell the bundle, value trade-ins and track repairs from intake to collection.

IMEI on every phone
Each phone needs a valid 15-digit IMEI, scanned from the box and checked against units already sold.

Warranty and protection plans
Warranty shows on each item, with optional extended warranty and screen protection plans.

Trade-in valuation
Value an old phone by model, condition grade and battery health and take it off the bill.

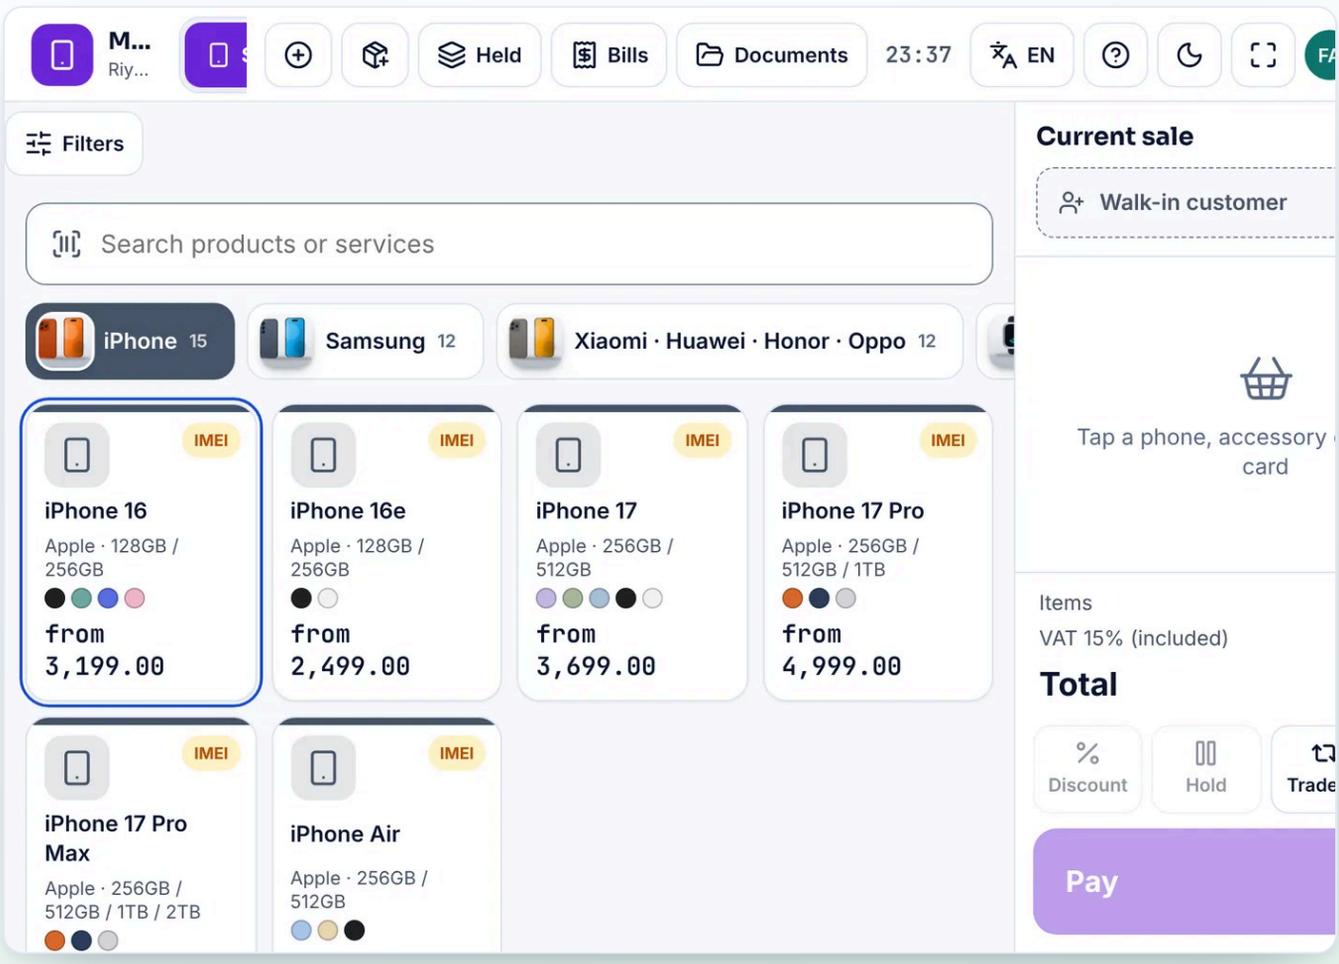

SIM and recharge sales
Sell prepaid SIMs with National ID or Iqama details, and recharge vouchers for all major networks.

Repair tickets and board
Log the device, fault, estimate and deposit, then move it from Received to Ready and collect.

Bundle upsell
Offer the case, glass and charger at a bundle discount with free fitting when a phone is sold.

Ideal for

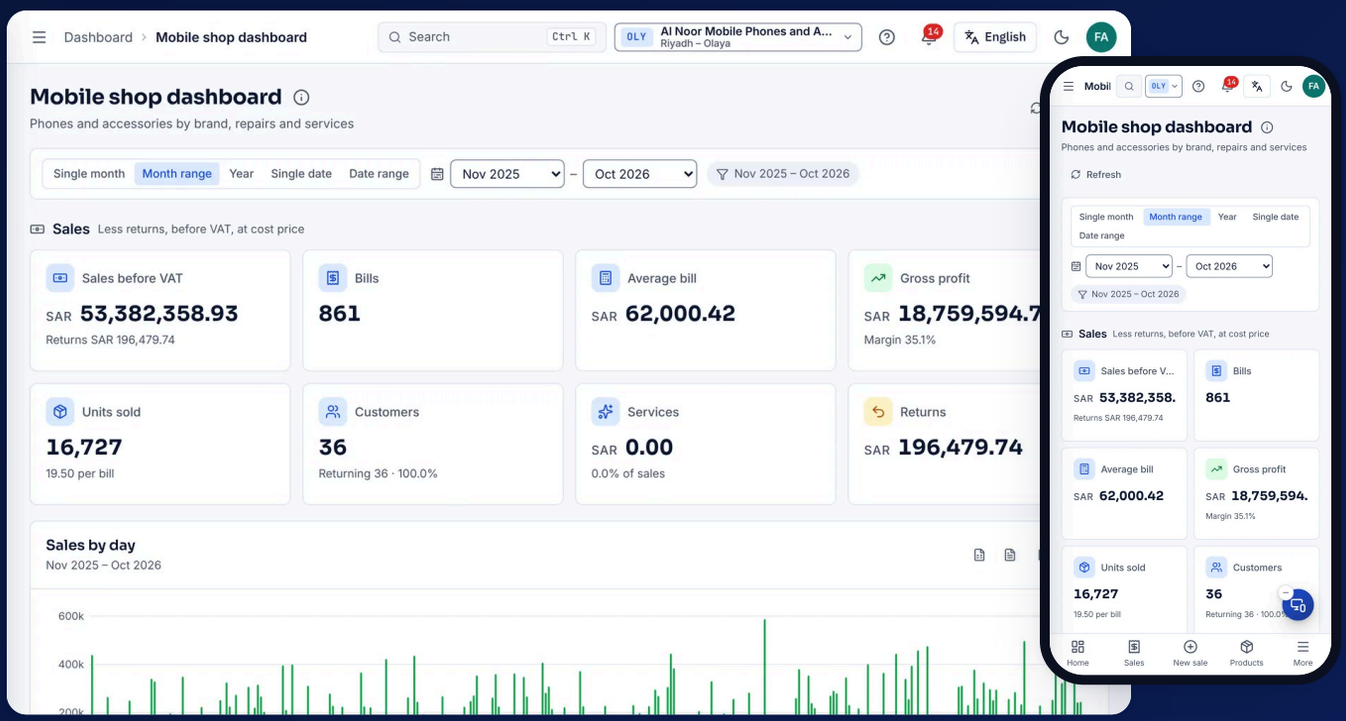

Mobile phone shops · Accessories stores · Phone repair centres · SIM and recharge points

COMPLIANCE

ZATCA Phase 2 e-invoicing, built in

- **Cleared and reported.** Tax invoices are cleared and simplified invoices reported, with the status on every invoice.
- **QR code and signed XML** on every invoice, printed or sent on WhatsApp and email.
- **Bilingual tax invoices** in Arabic and English with your CR and VAT numbers.
- **Offline till.** Keep selling when the internet drops; invoices go to ZATCA when you are back online.
- **VAT 15% reports** ready for your return, plus credit and debit notes.

Phase 2 comes with the ZATCA e-invoicing add-on; every store gets the Phase 1 QR code.

Questions owners ask

Does the POS record IMEI numbers?
Yes. Every phone sold needs its IMEI, which is validated (15 digits with a check digit) and checked so the same unit cannot be sold twice.

Can I manage repairs in the same system?
Yes. Create a repair ticket with the fault, estimate, ready-by time and deposit, track it on the repair board and load it to the bill on collection.
