AT THE COUNTER

# Made for the way you sell

Seat guests on a live table map, send each dish to the right kitchen station, take delivery orders with the driver and address, and split the bill however the table wants.

### Live table map
Indoor, family section and outdoor areas show seats, covers, status and time since seating.

### Dine-in, takeaway and delivery
Delivery orders record the source, app order number, address and your own or the app's driver.

### Kitchen tickets per station
Orders split automatically into tickets for the grill, kitchen and drinks stations.

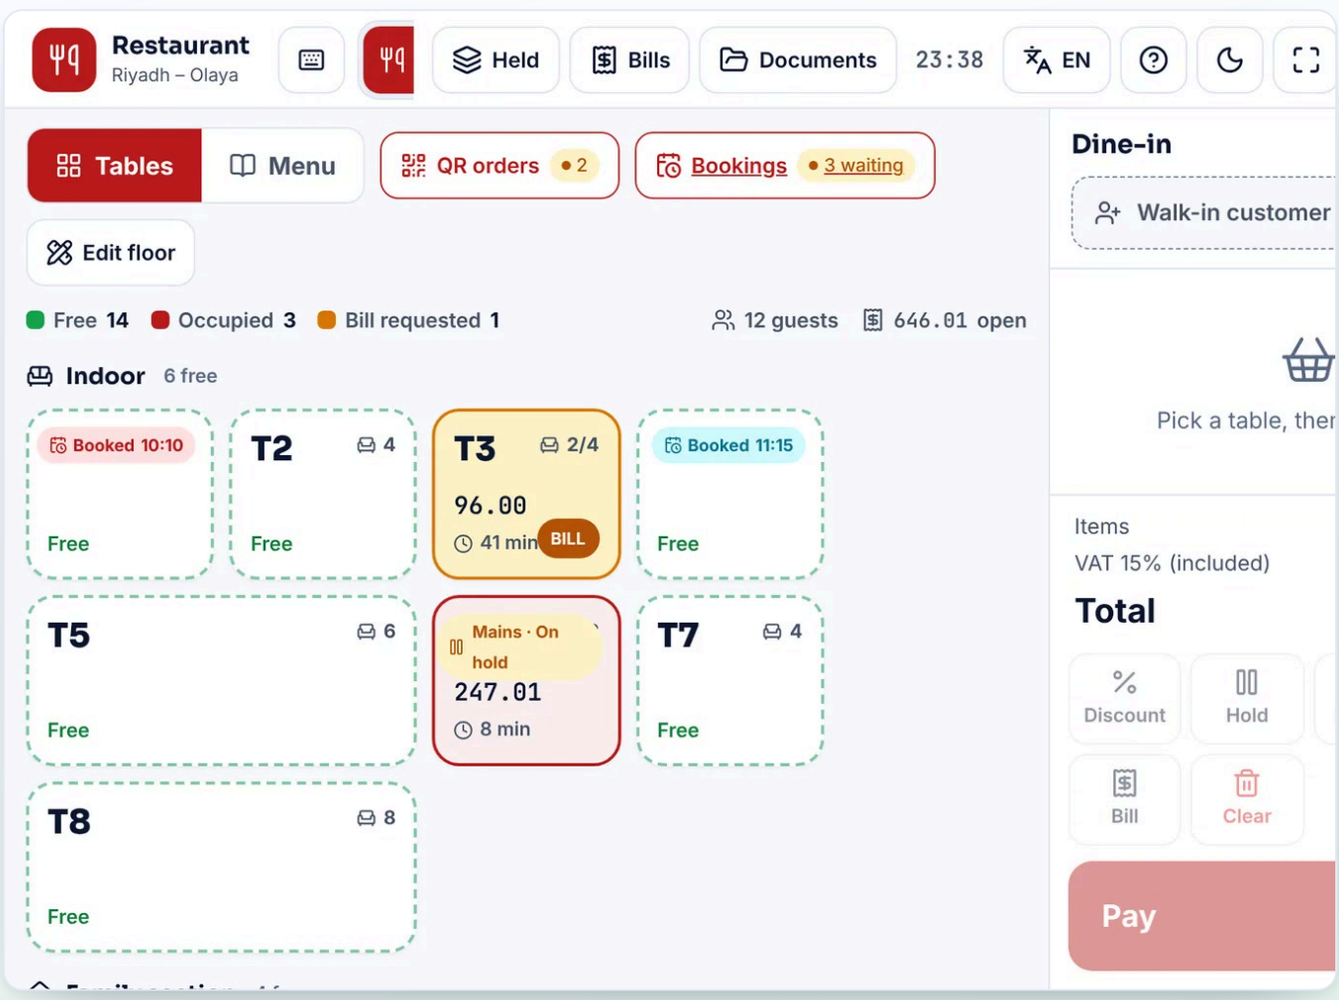

### Modifiers and notes
Portions, rice type, doneness, spice level, sides and add or remove options on every dish.

### Split bills and tips
Split equally or by items, let guests pay part of a bill and add an optional tip.

### Move tables and guests
Open a table with the guest count and switch tables without re-entering the order.

**Ideal for**

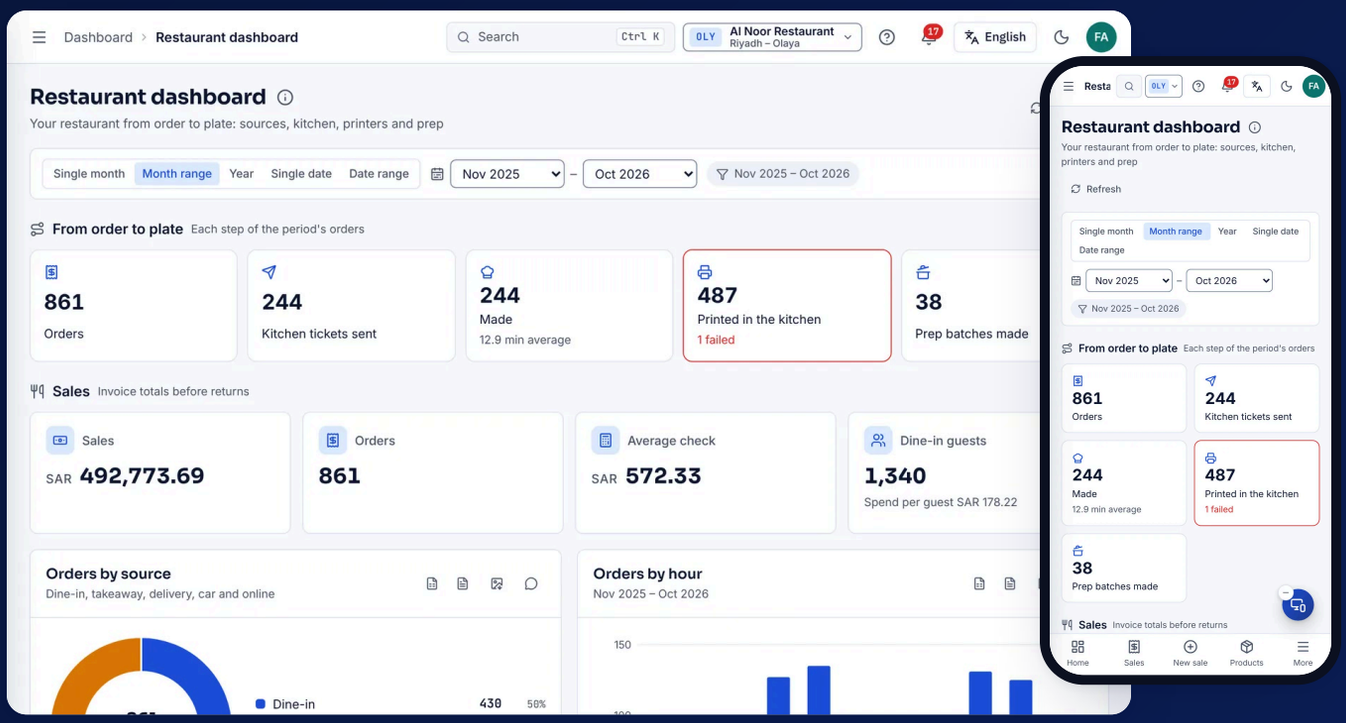

Family restaurants · Grills and mandi houses · Fast casual · Cloud kitchens

YOUR DASHBOARD

# Your business at a glance

Sales, profit and what sells, in your own words, on the computer and the phone.

COMPLIANCE

# ZATCA Phase 2 e-invoicing, built in

- **Cleared and reported.** Tax invoices are cleared and simplified invoices reported, with the status on every invoice.
- **QR code and signed XML** on every invoice, printed or sent on WhatsApp and email.
- **Bilingual tax invoices** in Arabic and English with your CR and VAT numbers.
- **Offline till.** Keep selling when the internet drops; invoices go to ZATCA when you are back online.
- **VAT 15% reports** ready for your return, plus credit and debit notes.

Phase 2 comes with the ZATCA e-invoicing add-on; every store gets the Phase 1 QR code.

## Questions owners ask

**Does it print kitchen order tickets?**
Yes. Each order is split into kitchen tickets by station, for example grill, kitchen and drinks, so every section only sees its own dishes.

**Can I take orders from delivery apps?**
Yes. Delivery orders record where they came from, the app's order number, the address and whether your own driver or the app's driver delivers.
