AT THE COUNTER

Made for the way you sell

Sell phones by model, storage and colour with the IMEI on every unit, upsell the bundle, value trade-ins and track repairs from intake to collection.

IMEI on every phone
Each phone needs a valid 15-digit IMEI, scanned from the box and checked against units already sold.

Warranty and protection plans
Warranty shows on each item, with optional extended warranty and screen protection plans.

Trade-in valuation
Value an old phone by model, condition grade and battery health and take it off the bill.

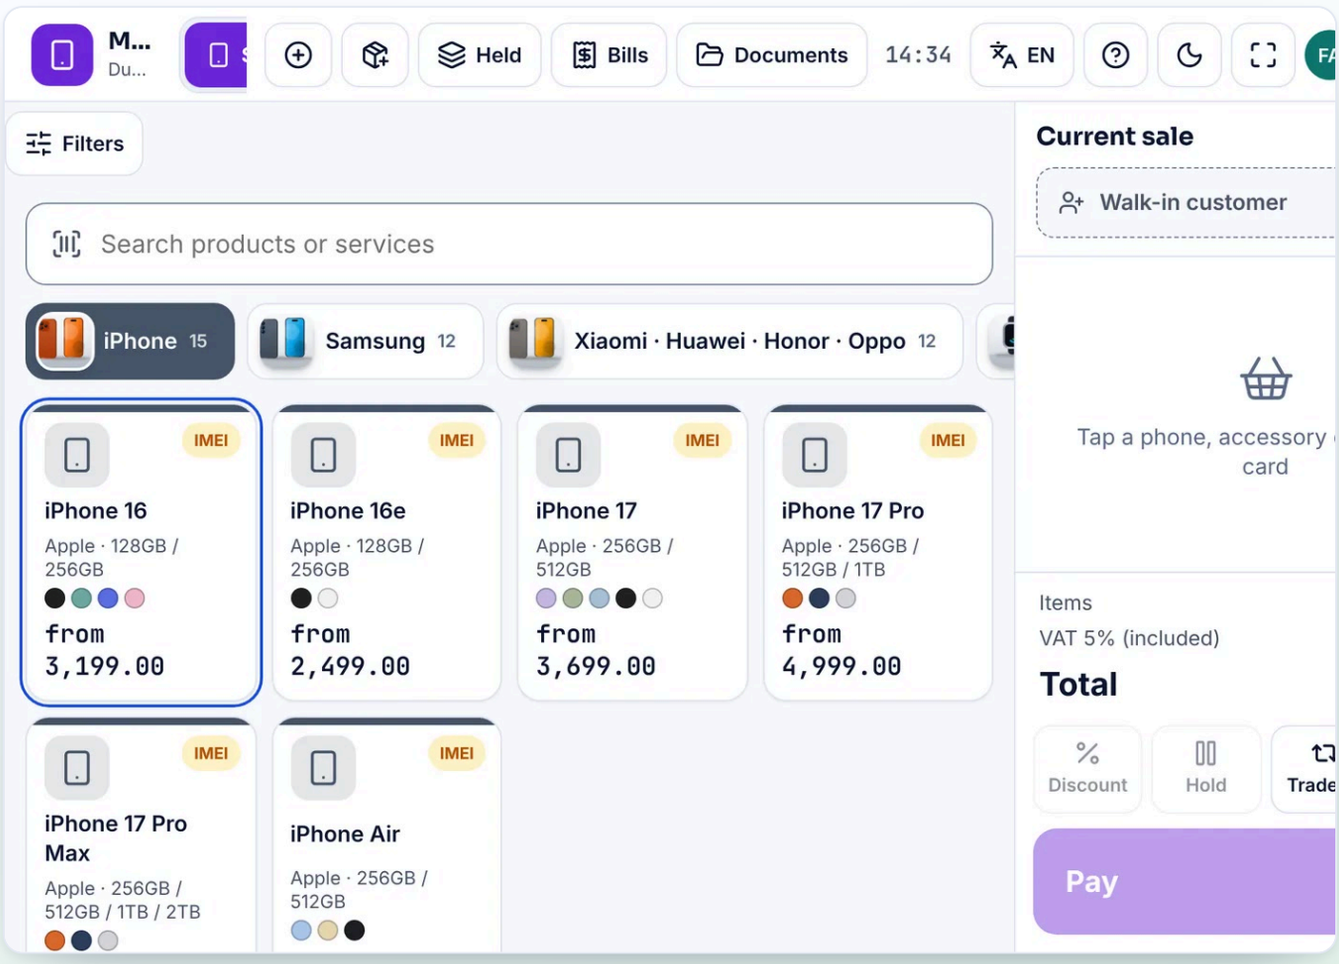

SIM and recharge sales
Sell prepaid SIMs with National ID or residence permit details, and recharge vouchers for all major networks.

Repair tickets and board
Log the device, fault, estimate and deposit, then move it from Received to Ready and collect.

Bundle upsell
Offer the case, glass and charger at a bundle discount with free fitting when a phone is sold.

Ideal for

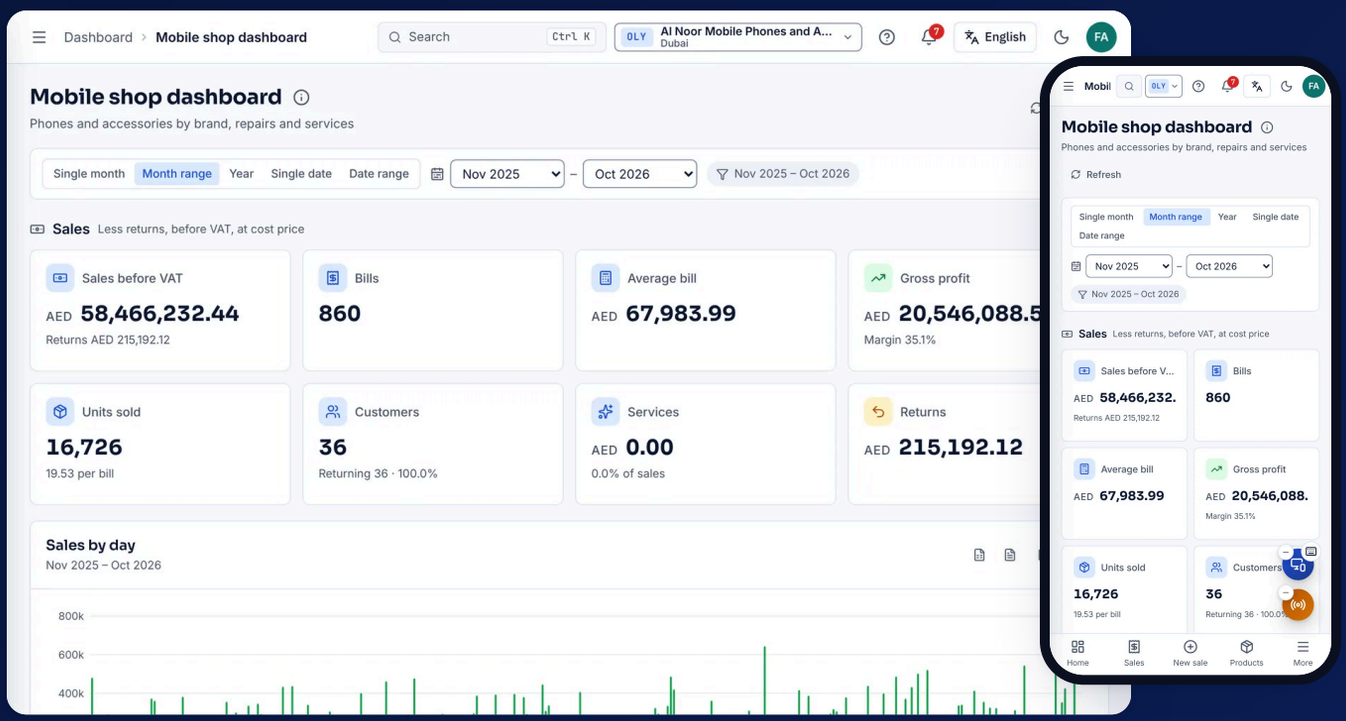

Mobile phone shops · Accessories stores · Phone repair centres · SIM and recharge points

COMPLIANCE

UAE VAT, done right

- **Tax invoices** with your TRN, your business customers' TRN and the VAT on every line.
- **VAT 201 return** laid out box by box, with your standard rated sales by emirate.
- **FTA Audit File (FAF)** and the sales and purchase tax register, downloaded in a click.
- **Offline till.** Keep selling when the internet drops; everything syncs when you are back online.
- **Credit and debit notes** and returns, with the VAT reversed for you.

The VAT 201 return and the FTA Audit File come with the VAT return add-on.

Questions owners ask

Does the POS record IMEI numbers?
Yes. Every phone sold needs its IMEI, which is validated (15 digits with a check digit) and checked so the same unit cannot be sold twice.

Can I manage repairs in the same system?
Yes. Create a repair ticket with the fault, estimate, ready-by time and deposit, track it on the repair board and load it to the bill on collection.
